

Town of Saukville Petition in Opposition to Power Lines

We, the undersigned residents of the Town of Saukville, are deeply concerned about the proposed American Transmission Company and Vantage Data Centers' proposed high-voltage power line project. We believe this project will have a devastating impact on our community's environment, safety, and property values. We demand that the project be reevaluated and that the company prioritize alternate routes using established towers. We strongly urge the American Transmission Company and the Public Service Commission take these concerns seriously and that they conduct a thorough environmental impact study before proceeding. Please sign this petition to show your support for protecting our community.

Town of Saukville Petition in Opposition to Power Lines

We, the undersigned residents of the Town of Saukville, are deeply concerned about the proposed American Transmission Company and Vantage Data Centers' proposed high-voltage power line project. We believe this project will have a devastating impact on our community's environment, safety, and property values. We demand that the project be reevaluated and that the company prioritize alternate routes using established towers. We strongly urge the American Transmission Company and the Public Service Commission take these concerns seriously and that they conduct a thorough environmental impact study before proceeding. Please sign this petition to show your support for protecting our community.

Community Petition Opposing the ATC Port West Power Line Route

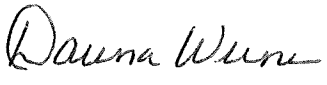

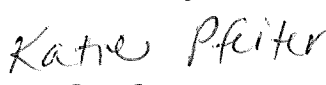

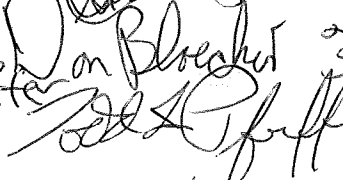

We, the undersigned residents of the Town of Saukville, respectfully oppose the proposed ATC Port West power line route.

This project conflicts with the Town Charter and Comprehensive Plan, which prioritize preserving farmland, protecting natural resources, and maintaining the rural character of our community.

Our concerns include:

- Loss of productive farmland.
- Permanent damage to sensitive ecosystems and wildlife habitats.
- Irreversible harm to Saukville's scenic, rural character.
- Negative impacts on property rights and values.
- Health and safety concerns for residents living near the lines.

We urge Chairman Kevin Kimmes and the Town Board to reject the proposed route and pursue alternatives that protect Saukville's farmland, natural resources, and community values.
